# How can I use data to help me to solve problems?
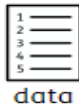

Word	Definition
sort	**Put similar things together**

Could you sort these shapes into circles and squares?

Are there other ways we could sort them?

What about into colours?

This is a pictogram. How many bears are in each colour? Can you count them?
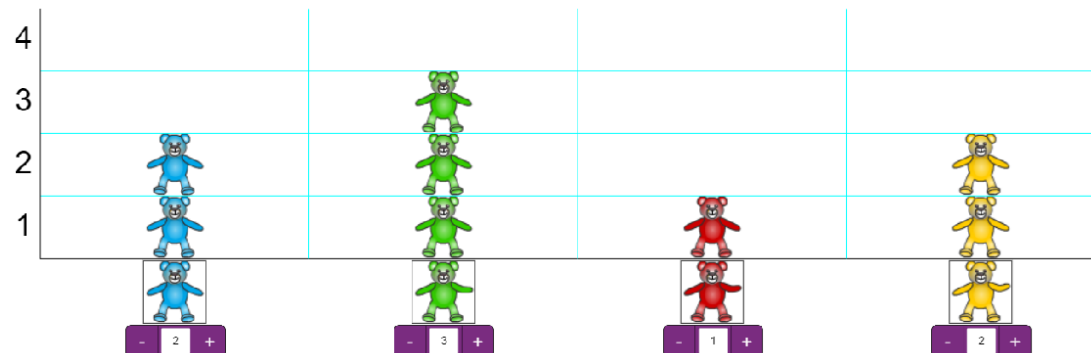

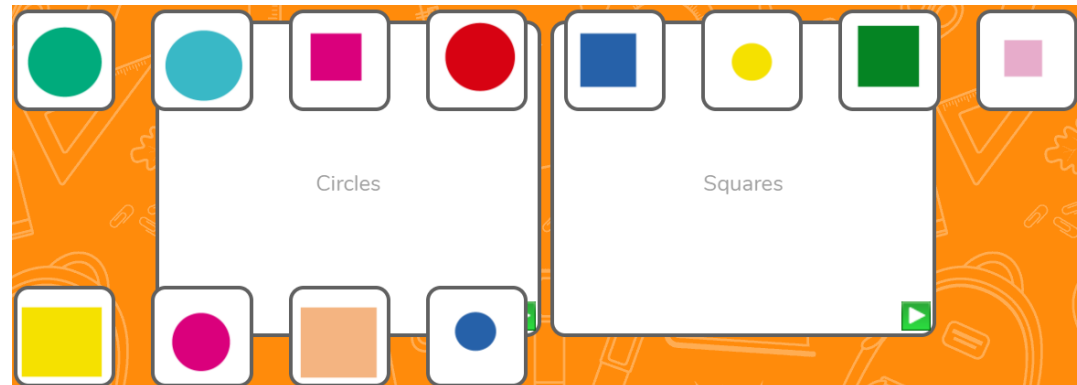

Word	Definition
data	**Facts that can give information**
pictogram	**A diagram that uses pictures for data**

Word	Definition
program	**To give coded instructions to a computer**
debug	**To find and remove errors**

Can you spot what is wrong with the boy's car? How can you fix it?
