

# How am I connected to others online?

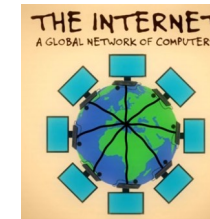

Word	Definition
Network	<b>Several interconnected devices</b>
Router	<b>A device that forwards data over a network</b>
Local Area Network (LAN)	<b>A network that linked devices within a building</b>
Wide Area Network (WAN)	<b>A network that linked devices over long distances</b>

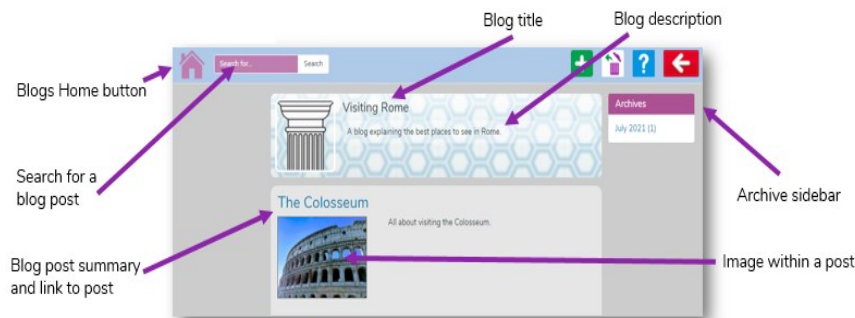

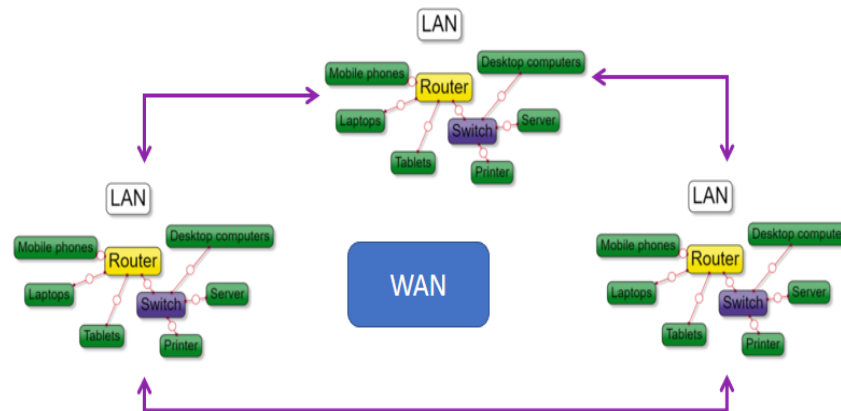

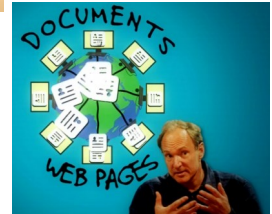

Do you think that everyone, everywhere has access to the Internet?

Do you know what devices and resources are needed to access the Internet?

Look around the classroom, what Internet connected devices or equipment can you see? How do they connect to the Internet?

Are the Internet and the World Wide Web the same? Why?

Click on a **blog post** by clicking the title.

Look at the key features of the example blog post:

Word	Definition
