grow	Get bigger in size

Sometimes plants can grow in the dark but they do not grow well.

Key Knowledge and Concepts

All plants grow from seeds or bulbs.

All plants need water to grow and survive

When plants begin to grow (germination) they

Plant growth

Plants grow roots then a shoot.

The shoot gets larger, becoming the stem and then the plant grows leaves.

Some plants have flowers or fruit

Lots of plants begin to grow in the spring

This is because the temperature begins to get warmer.

Some plants grow in cooler temperatures and some grow in warmer temperature.

Plants need light from the sun so they can grow well and be healthy.

The green leaves use the sunlight to make food.
