

## How do animals get their food?

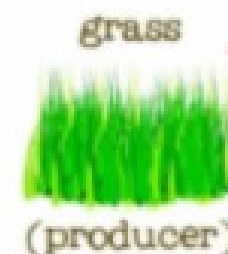

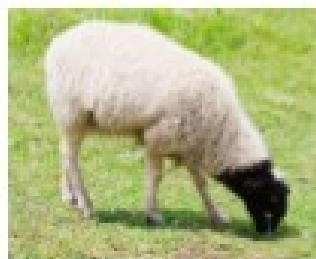

Do they eat each other?

### Key Knowledge and Concepts

Word	Definition
Food chain	Living things that eat each other
Predator	An animal that eats other animals
Prey	An animal that is eaten by other animals
Green plant (producer)	Produces its own food from the sun

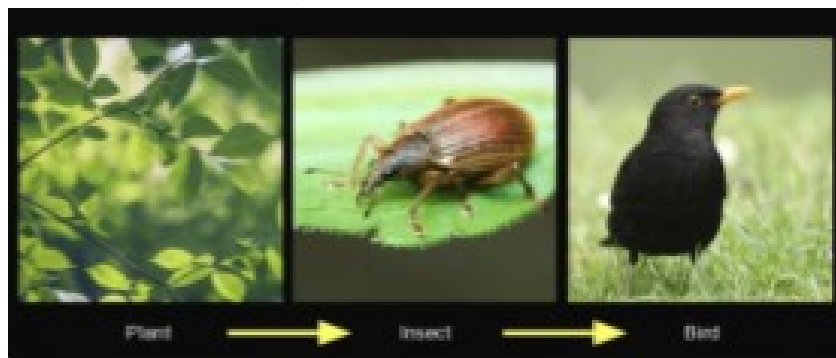

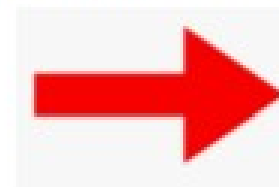

Animals get food by eating plants or other animals

Food Chains always begin with a plant

Food chains show what animals eat

The arrow means is eaten by:

Each food chain has an animal that eats a plant (prey) and an animal that eats it (predator)
